

# Slide Rack Assembly Instructions

## SR-AFR/AFW/AHL/AHW

- Thank you very much for purchasing Daiken's slide-type rack.
- Please read this manual carefully to ensure proper installation.

SR-AFR

SR-AFR

SR-AFW

SR-AHW

1. Follow the assembly instructions during installation.
2. Install on a solid, level concrete foundation.
3. Ensure the rack is installed horizontally.
4. Do not install in unstable or high-wind locations.
5. Anchor fixing on a concrete foundation is required.
6. Install anchors only after the concrete has fully cured.
7. Remove concrete dust before anchor installation.
8. Use anchor holes of the specified size.
9. Do not modify the product.
10. Wear appropriate protective equipment during installation.
11. After installation, check all fasteners and ensure smooth rack operation.

## [ Packing List ]

### SR-AFR • AHL (Rail and Rack packed in the same carton)

Package No.	Package Name	Part Name	Qty
Y1-0104	Base Rail (4m)	Rail (4m)	1
		Rail Bracket	5

16	5800	6400							780	-					
17	6100	6700								80	AHW				
18	6400	7000								380	567		AHL		4m x 2
19	6700	7300								680					
20	7000	7600								980					

## ○ Total Rail Length Calculation (Up to 20 units)

Total Rail Length = Rack Pitch x Units Qty + Slide Space  
 ex. 300mm x 10units + 1

## ○ Installation Space Calculation

Installation Space = Total Rail Length + End Clearance  
 ex. 300mm x 10units + 1

\*Anchor Drill Diameter: 8.5mm  
 Hole Depth : 58mm  
 (Drill slightly deeper as needed.)

## ○ Installation Space Calculation (21 units or more) \*Provide 50mm gap every 20 units

Installation Space = Total Rail Length + Separation Space + End Clearance  
 ex. 21 Units (10 + 11 Units)  
 (4000mm + 4300mm) + (50mm x 1 spot) + 300mm x 2 spots = 8300mm

\*For heavy bicycles (ex. child-seat bikes), fewer units are recommended.

# [ Rail Processing ]

## ○Rail Cutting

Cut the rail to the required length according to the units. (See Rail Layout)

Package	Name	Rail Length
Y1-010 4	Base Rail 4m	4000 mm
Y1-011 2	Connector Rail 2m	2000 mm
Y1-011 4	Connector Rail 4m	4000 mm

(Ex.) 16 Units Total Rail Length: 5800 mm

Rail Quantity  $\left\{ \begin{array}{l} \text{Rail 4000mm} \quad \text{AFR} \cdot \text{AHL} \quad 1 \text{ Rail} \leftarrow \bigcirc \times 2 \\ \text{Rail 2000mm} \quad \text{AFW} \cdot \text{AHW} \quad 1 \text{ Rail} \leftarrow \bigcirc \times 2 \end{array} \right.$

Cut Length: 4000 mm + 2000 mm – 5800 mm = 200 mm

(\*Cut 200 mm from the 2000 mm rail.)

## ○End Hole Drilling

Drill holes as shown for mounting rail brackets, end caps, and connectors.

Drill **Ø6.5 mm x 1 hole** and **Ø7.5 mm x 1 hole**, referring to rail grooves.

## ○When adjusting intermediate anchor pitch

Keep anchor pitch within **1010 mm**.

Order additionally rail brackets as needed and reposition.

Drill **Ø6.5 mm x 2 holes** at rail grooves.

# ① Rack Assembly

## ○ Attach connecting parts and end components

- Slide rail brackets in from the side of the rail (place drilled hole side at the rear).
- Install connecting parts with no gaps.

\*Note: Install rails horizontally. If inclined, adjust level.  
Allowable slope:  $\leq 1.0\%$  (longitudinal),  $\leq 0.5\%$  (transverse).

• Rail Installation direction

AFR<sub>Type</sub>  
AHL<sub>Type</sub>

AFW<sub>Type</sub>  
AHW<sub>Type</sub>

## ○ Installing the middle section

- Slide the rail brackets from the end and secure at two points with screws.

## ② Rack Assembly

### ○ Attach Slide Bracket (AFR•AHL Low Rack)

• Insert screws into the front wheel guide and fix the slide fitting at the position below.

**Pay attention for Slide Fitting!**  
Position horizontal roller at the **back**.

#### Mounting Position

\*Cut out the sticker printed on the top of the parts box and use it as a guide for installing the slide brackets.

SR-AFR Rack [A fixed position]      SR-AHL Rack [fixed position]      SR-AFR Rack [B fixed position]

#### Sticker

← Caster 137.5mm →				Slide Fittings (P400) RackB ← 56mm →
DAIKEN Slide Rack				
Y1-0203				
SR-AFR	Box 3	Lot No.		
← Using SR-AHL Slide Fittings Low Rack 157mm →				

### ○ If bicycle storage is tight

Adjust the slide fittings to change the staggered depth up to 450mm.

\*1

A depth difference under 400mm may cause bicycles to touch and reduce handling space.  
A 450mm difference is recommended for 3-seater family bicycles.

## ② Rack Assembly

### ○ Bracket & Support Post Installation (AHL High Rack)

• Fix the support post to the slide fittings.

### ○ Rack & Post Installation

• Insert bolts and secure at the specified positions.

\*Use the box-top template as an installation guide.

## ② Rack Assembly

### ○ Mounting Caster (AFR•AHL Low Rack)

- Fix the support post to the slide fittings.
- Install the caster brackets at the specified positions (see below).

\* Use the box-top template as an installation guide.

Mounting Position

Template

← Caster 137.5mm →	
DAIKEN Slide Rack	
Y1-0203	
SR-AFR	Box 3 Lot No.
← Use SR-AHL Slide Fittings Low Rack 57mm →	

#### When using Spacer

Install the spacer between the caster bracket and rack frame as shown.

### ○ Mounting Caster (AHL High Rack)

- Fix the support post to the slide fittings.
- Install the caster brackets at the specified positions (see below).

\* Use the box-top template as an installation guide.

Mounting Position

Template

← Caster 83mm →	
DAIKEN Slide Rack	
Y1-5203	
SR-AHL	Box 3 Lot No.
← Slide Fittings 86mm →	

#### When using Spacer

Install the spacer between the caster bracket and rack frame as shown.

## ② Rack Assembly

### ○ Mounting Caster (AFW•AHW Low Rack)

- Same installation method as AFR/AHL models.
- Secure the slide fittings at the positions shown below.

**\*Slide fitting direction differs from AFR/AHL models.**

### ○ If bicycle storage is tight

Adjust the slide fittings to change the staggered depth up to 450mm.

- \*1 A depth difference under 400mm may cause bicycles to touch and reduce handling space. A 450mm difference is recommended for 3-seater family bicycles.

- Insert screws into the rack frame and secure the slide fittings and AFW brackets (see below).

\*2 Dimensions vary depending on the adjustment.

## ② Rack Assembly

- Secure the support post and slide fittings at the positions shown below.

Install horizontal roller at the **front**.

- Insert screws into the rack frame and secure the slide fittings and AHW brackets (see below).

Install horizontal roller at the **back**.

## ② Rack Assembly

### ○ Mounting Caster (AFW•AHW Low Rack)

- Insert the guide cover and secure it through the holes in the plastic part.  
(No holes are provided in the rack frame.)

**\*If using a stopper, install it first.  
(Refer to the stopper assembly instructions.)**

## ③ End Cover Assembly

### ○ End Cover Installation

Insert the rack into the rail and install the end covers.

- \*1 Slide the end covers onto the rail brackets and secure with truss head screws and anchor bolts.

#### ④ Warning Label Application

##### ○ Warning Label

- Apply the label to a visible area on the rail.

**Make Sure to check all screws and operation.**
